EDUCATION

LEARN ACADEMY

November 2022 - March 2023

VOLUNTEER

LEARN ACADEMY | Jumpstart Jan & Feb 23

Assisted teachers in mentoring 27 students. Provided guidance on alleviating blockers, to complete projects in a timely manner.

PROFILE

Full Stack Software Developer and former military veteran, who is enthusiastic about applying their skill set to secure a job within the tech industry to utilize skills to fullest potential.

WORK EXPERIENCE

Web Developer

Mind at Bay   2023-2023

- Developing a progressive web app (PWA) and native mobile apps with FlutterFlow
- Pivoting the development of features and meeting deadlines according to the needs of our stakeholders and legal team
- Communicating with stakeholders when there are roadblocks or limitations with design, legal team, or development
- Making informed decisions about the tech stack according to stakeholder and user need

Web Developer (Intern)

XplorStem   2023-2023

- Successfully filtered and formatted over 30 data tables, enabling dynamic data exchange for web application users.
- Proficiently executed Jest testing on a Next.js application, guaranteeing optimal functionality and identifying any potential issues.
- Employed effective communication strategies to collaboratively develop applications in pair and mob programming settings.
- Designed and developed pages for seamless implementation of an assessment, safety video, and assessment results page.
- Developed comprehensive test suite using Jest for a Next.js web application, covering both front-end and back-end functionality.
- Improved testing efficiency and effectiveness by implementing mock functions and fixtures for dependencies and API calls.
- Collaborated with development team to establish testing best practices and incorporate testing into the development process.

Full Stack Web Developer

LEARN ACADEMY   2022-2023

- Completed 480 hours of direct coding experience in an intensive remote development bootcamp.
- Trained to obtain proficiency in building JavaScript, Ruby and React applications.
- Utilized efficient communication techniques to assemble applications in pair programming and mob programming scenarios.
- Obtained daily experience on creating pull requests, and creating local branches to securely make revisions to repositories stored on GitHub.
- Designed a personal portfolio to showcase newly acquired skills.
